PROJECTS

Project 1 : Student Form with CRUD using Local Storage in React.js:

Tech Stack: React.js, JavaScript, HTML, CSS, Local Storage
Built a student management system with CRUD features using React and local storage. Supports adding, editing, deleting, and persisting student data across sessions.

Project 2 : Employee Management System

Tech Stack: React.js, React Router, JavaScript, HTML, CSS, Local Storage
Built an employee management system with admin login and protected routes using React Router. Includes CRUD operations, dynamic employee list, and persistent data with local storage.

Project 3 : React Landing Page

Tech Stack: React.js, Bootstrap, HTML, CSS
Created a responsive landing page using React.js and Bootstrap with smooth layout, interactive components, and mobile-first design. Focused on clean UI and modern section-based structure.
